- Advanced technical and manual skills.
- Solving technical problems.
- Assembly and installation of computer hardware and software.

TOOLS

- Microsoft Windows
- Microsoft Office
- Active Directory
- Linux
- Apple ecosystem
- ServiceDesk Plus
- ServiceNow

SUMMARY

I am an IT Support Specialist with over 3 years of experience in end-user device management (Windows, macOS, Linux) and identity administration across cloud and hybrid environments. I work daily with MDM solutions such as Intune and Jamf Pro, and I manage user accounts and access in Active Directory and Okta. I have experience in both large-scale hardware deployments and independently delivering end-to-end IT support for entire office environments. I hold the Google Cybersecurity Professional Certificate and have a strong interest in open-source technologies. I am currently expanding my skills in system administration and networking through advanced hands-on projects in my home lab.

CAREER GOAL

- Develop skills in systems administration and technical support to improve the efficiency of the IT infrastructure.
- Implement new solutions and streamline support processes to improve user satisfaction and productivity.

WORK EXPERIENCE

Freelance IT Support & Skills Development

12/2025 - Present

- Delivered independent IT support services for individual clients, including hardware diagnostics and repair, peripheral device configuration (e.g. printers), and operating system optimization.
- Expanded practical knowledge of Linux system administration (distribution testing, permissions management, file systems, and CLI usage).
- Designed and maintained a home lab environment for hands-on learning and advanced system configuration.

Linux Systems Support & IT Projects (Freelance)

09/2025 - 11/2025

- University of Warsaw – Provided technical support in a Linux-dominant academic environment (Ubuntu, Debian), including hardware and system diagnostics for researchers and engineers.
- Warner Bros. Discovery – Delivered ad-hoc IT support, including infrastructure assistance and hardware inventory management.

SOFT SKILLS

- Proactive attitude and commitment.
- Effective communication.
- Accuracy, meticulousness
- Responsibility, self-reliance.
- Continuous desire for self-improvement and learning.

LANGUAGES

- Polish (native language)
- English (C1)

EDUCATION

Akademia nauk stosowanych im. Haliny Konopackiej w Pruszkowie

2021 - 2025

Field: Management

Specialization: e-sports

HOBBIES

- Diagnose and repair computer equipment to ensure its efficiency.
- Creating computer graphics using various tools and techniques.
- Keeping up with the latest technologies and their impact on society.
- Passion for computer games and innovative solutions in the entertainment industry.

IT Support Engineer - Xperi Inc.

09/2024 - 05/2025

- The only IT support engineer for the Warsaw office (~200 employees), responsible for all on-site IT support and maintenance of video conferencing systems.
- Handled 20+ daily technical requests via ServiceNow, with a strong focus on direct end-user support.
- Managed laptop fleet (Windows, macOS, Linux) using Intune and Jamf Pro; administered accounts and access in Okta, Active Directory, and AWS environments.
- Led end-to-end lifecycle management of IT equipment (provisioning, deployment, inventory) for employees.
- Provided high-priority VIP support for senior leadership on-site.

Short-term IT Projects & Support (Freelance)

02/2023 - 09/2024

- Euvic IT - Prepared and configured 100+ Windows workstations for corporate users.
- KPMG (Poland) - Diagnosed hardware issues, handled ITSM tickets, administered user accounts in Active Directory, and provided VIP support for senior management.
- LUX MED (Poland) - Delivered remote IT support, handled ticketing systems, and configured applications.
- Coty Inc. - Provided global IT support in English and managed user accounts.
- Freelance Projects - Hardware diagnostics, printer repair, and home network configuration.

Technical Customer Service Specialist - ASUS Poland Sp. z o.o.

10/2021 - 01/2023

- Handling customers calls and providing prompt assistance in resolving issues.
- Providing technical support to customers, sharing information about new features and solutions.
- Actively participate in technical forums, providing assistance to users and building a support community.
- Effectively redirect customers to appropriate departments or specialists.
- Monitor trends and analyze customer requests to identify recurring issues.
- Participate in training and improve skills in the customer service area.
